

## OBJECT LESSON OR KIDS SERMON

### ITEMS NEEDED:

Potted plants

*Bring in a few potted plants. Let the kids see them, and tell them what they are. Be sure to tell them how much sun they require.*

Plants, like people, love the sun. They need it to survive. Water and carbon dioxide just aren't enough for them. If a plant doesn't get the sun it needs, it can't grow properly.

God wants us to get some "sun" too - his son Jesus. God sent his son to Earth so that we could know him personally. We have the gospels that tell us who Jesus was and what he did for us. We have prayer as a means to get to know him ourselves.

Knowing Jesus allows us to live like Jesus. We learn to be humble and put other people first. We learn to love the way Jesus did. We live lives that are holy. We avoid sin, and we point others to Jesus.

The more time we spend with the Son of God, the better we know him. The better we know him, the more we become like him. Ask Jesus to reveal himself to you. He will not let you down!
