

AT THE BEACH

OBJECT LESSON OR KIDS SERMON

ITEMS NEEDED:

Legos

Build two Lego buildings - one set on a Lego platform base, and one freestanding. Ask the kids which building they think will be the sturdiest. You might even test them by bouncing a tennis ball against each one.

Both of these buildings are similar. They were both built with the same materials by the same creative hand. So what's the difference? One is loose and doesn't have any foundation. The other was built on a solid foundation. It has roots, and that makes it much stronger than the other.

Jesus told a parable to teach us how important it is to build our lives on Him. There are many false religions that would tell us they have a better foundation, and many other philosophies that would tell you the same. Only Jesus is God's Son. Only he can save us from our sins. Only he can give us the strong foundation we need to weather storms and to attain eternal life.

Don't build your life on false beliefs, false hopes, and false religions. Build it on Jesus, the one true, firm foundation.
